INTRODUCING.....

Elbert County has teamed up with the 911 Authority board, Fire Departments and local Towns to implement CodeRED, an emergency notification system via phone, a service **FREE** to Elbert County residents. There are two components to this system:

- 1) Reverse Emergency Notification calls
- 2) Weather Warning Notifications calls

The CodeRED emergency notification system is a communication service available for emergency and non-emergency notifications. CodeRED employs intranet mapping capable of geographic targeting of calls, coupled with a telephone calling system capable of delivering a pre-recorded message directly to homes and businesses at the rate of up to 60,000 calls per hour.

The system's main purpose is to notify citizens or groups of citizens in emergency situations; however the system has the ability to be used for non-emergency notifications as well.

CodeRED NOTIFICATION MAY BE INVOKED FOR EMERGENCY PURPOSES.
Examples of when the CodeRED system might be exercised by County or Town municipalities:

- Boil Water rule
- Evacuations
- Bomb Threat
- Chemical spill or Gas leak

CodeRED WEATHER WARNING will deliver severe weather warnings to your telephone and/or cell phone within seconds after being issued by the National Weather Service. You will only get the warning if you physically live in the area that is in the warning!

To sign up, go to WWW.ELBERTCOUNTY-CO.GOV and look for the CodeRED ICON!
